

In the spotlight....

Q. What is your role at Method?

A. Project Engineer

Q. What does a typical day look like for you?

A. Typically I spend the first part responding to emails then cracking on with some design work on a range of projects which could involve calculations, drawings or reports. The best thing about having a large range of projects is I can mix up what I want to do on a day to day basis and not be stuck just working on one project. I could also end up out the office at design team meetings, meeting with clients or site meetings.

Q. What is the favorite part about working for Method?

A. Atmosphere. The office is very relaxed and people will chat throughout the day which is nice & friendly but everyone is also exceptionally hard working and makes sure the job is done and deadlines are met. A perfect balance.

Q. Three words to describe Method?

A. Challenging, Fun, Interesting

Q. What drew you to Method originally? And how has Method changed since?

A. When I graduated from University I knew I wanted to go into something sustainability related but didn't know in what industry. When looking into different fields I saw an advert that described a "bright, passionate, bubbly engineer" and I thought hey that's me, applied and here we are.

Q. What has been your favorite project at Method?

A. Crux HQ. The project was for a product design company so the aesthetics were very important. Services that were exposed had to be coordinated to give an aesthetically pleasing look, I enjoyed working closely with a great team of architects.

Q. If you could switch your job with anyone else within Method, whose job would you want?

A. Currently I love my role as I am learning so much about engineering and want to focus on expanding my engineering knowledge firstly but I would like to understand more about the business side and bids etc..

Q. Before working at Method, what was the most unusual or interesting job you've ever had?

A. Breakfast Chef at a hotel, not particularly unusual but quite interesting especially during wedding season.

Q. What would you do (for a career) if you weren't doing this?

A. My love of food comes through, I'd train to be a chef and have my own little restaurant where I can change the menu as and when I want so it's not the same every day.

Q. What advice do you have for prospective Method candidates?

A. Don't be afraid to ask questions if you don't know something, everyone is happy to help out. For graduates especially this is often the first exposure to building services so no question is a silly question.

and the fun questions!

Q. If your house was burning down, what is the one non living thing you would save?

A. A framed painting my house mate did for me for my 21st birthday from the Disney film Up with the line "Adventure is out there" (I'm a Disney child who loves an adventure).

Q. Motto or personal mantra?

A. Adventure is out there

Q. What did you want to be when growing up?

A. Dennis the Menace

Q. What is the first thing you would buy if you won the lottery?

A. A pint

Q. What is your favorite sport?

A. Football, I am a season ticket holder to Watford FC.

Q. What micropower would you want?

A. The ability to eat & drink anything I want (and as much of it) and it not affect my health or weight.
