

In the spotlight...Ethan Lee

Q. What is your role at Method?

A. A CAD Technician for Building Services and Environmental engineering.

Q. What does a typical day look like for you?

A. My day-to-day task involves working with engineers within Method to document building services for important projects in the construction industry.

Q. What is the favourite part about working for Method?

A. My favourite part is the sense of community. We're always planning and taking part in social and charity events, which changed my perception of a working environment.

Q. Three words to describe Method?

A. Challenging. Fun. Helpful.

Q. What drew you to Method originally?

A. The smaller, social working space attracted me as I've lived in a small town all my life and felt that Method ticked the boxes for me.

Q. If you could switch your job with anyone else within Method, whose job would you want?

A. I would say one of the Building engineers as I'm studying a Level 4 qualification in my apprenticeship right now, which will then lead to a career as a building services engineer. But if I was an engineer right now, then I could learn much more.

Q. Before working at Method, what was the most unusual or interesting job you've ever had?

A. Just before joining Method I was kitchen aid in a pub! It was a hard graft and I learnt much, but I don't miss it!

Q. What would you do (for a career) if you weren't doing this?

A. I might still be working in a pub. Despite the hard work it was always a great feeling to create my own food and to see that I'd done a good job by the end the day.

Q. What advice do you have for prospective Method candidates?

A. If you're applying for the CAD Technician role like I did, then a Level 3 BTEC qualification in a related subject will look very good on your personal record.

and the fun questions!

Q. If Hollywood made a movie about your life, who would you like to see cast as you?

A. Morgan Freeman. He doesn't really look like me as such but he's one of my favourite actors and I think it would cool to have my life narrated in his deep voice.

Q. What is an ability you wish you had?

A. Teleportation. I'm lazy.

Q. Which one would you want most flying cars, robot housekeepers, or moon cities?

A. I think that Moon cities would be a nice idea until you consider it's effect on the cheese industry. The moon is abundantly made of cheese and I think that quantity would collapse the economy and lead to a second Great Depression.

Q. What book did you read last??

A. 'Raising Steam by Terry Pratchett.

Q. What did you want to be when growing up?

A. An inventor for the large part. Back then I used to draw out all my musings and had a pile of paper almost as tall as I was. I also wanted to be a train driver, because what kind 4 year old kid didn't.
