

In the spotlight...Kristopher Price

Q. What is your role at Method?

A. Building Services Engineer and charity rep

Q. What does a typical day look like for you?

A. My daily work consists of e-mailing as well as a few phone calls to coordinate with other professions working on my projects, making drawings, reviewing and revising drawings and then working with the CAD team to get the drawings done. When I'm not doing one of those things, I'm probably tormenting Barry with endless questions and a bit of banter. I'm in unit 3 for lunch for a good chat and a game of pool or 2.

Q. What is the favourite part about working for Method?

A. The friendly atmosphere and opportunity to really get stuck into projects.

Q. Three words to describe Method?

A. Challenging, friendly, team

Q. What drew you to Method originally?

A. I was drawn to Method by the focus on sustainability and wide variety of projects they have to offer.

Q. What has been your favorite project at Method?

A. My favourite project so far has been a care home I'm currently working on, it's been my first opportunity to really get stuck into the design elements of a project and that's been really interesting.

Q. If you could switch your job with anyone else within Method, whose job would you want?

A. I'd swap with someone in the sustainability department, sustainability all the way! So maybe Ross, although I'm not sure what they're typical days actually look like, maybe I should find his Employee Spotlight.

Q. Before working at Method, what was the most unusual or interesting job you've ever had?

A. My most unusual job was as a kind of door to door salesman, but for charities. It was winter, the hours were really weird, I was trying to do uni at the same time and people really don't seem to appreciate that Guide Dogs for the Blind need donations when they've just got home from work and had you knock on their door... I didn't stay there for long.

Q. What would you do (for a career) if you weren't doing this?

A. Some other kind of engineering, I'd probably go back to Aerospace or try something else knew, like biomedical engineering (if I could get into it).

Q. What advice do you have for prospective Method candidates?

A. Try not to stress out too much, you're expected to work hard, but so long as you get help when you're stuck and do your best, you'll be okay. Also, enjoy it, there's lots to do and loads of great people, so make the most of it.

and the fun questions!

Q. What is an ability you wish you had?

A. An ability I wish I had is singing, imagine the humming and whistling I do currently in the office, but now it's singing! (Without making your ears bleed)

Q. What do you like to do in your spare time?

A. I like to play the keyboard in my spare time, when I'm not distracted by Netflix.

Q. If you were an animal what would you be?

A. If I was an animal, I'd be a dog, because enslaving humans to your will through cuteness has only been done by a few species and I'm not a cat person.

Q. What is the most important thing you have learned in the last five years?

A. The most important thing I've learned over the past 5 years, is to trust in God and it's a lesson I continue to learn and improve on to this day.

Q. Any random facts you could share with us? Any random facts you could share with us?

A. There are many random facts I could share, but one of my favourites is that the Crest Auklet (a bird species) has a patch on it's back that smells like tangerines and scientists aren't really sure why.
