We are Building Services Engineers and Sustainability Consultants
with offices in Swindon, Bristol and Plymouth

East Northamptonshire Enterprise Centre

Building on our experience across several enterprise and innovation centres we are delighted to have been selected to join the design team working on the East Northamptonshire Enterprise Centre (ENEC) project. The new centre will provide accommodation for up to 90 start-up local businesses and will include both offices and workshops.

Bicester Eco-Business Centre

Due for completion shortly this project is aiming for Passivhaus Plus certification, BREEAM Excellent and will be zero carbon. Connected to the wider exemplar site district heating from the nearby energy centre, solar PV offsets the remaining CO².

The building already has a natural feel with plenty of timber finishes, acoustic treatment in office space and plenty of natural daylight through the atrium roof lights. Main contractor Kier have been proactive in their approach to sustainability, with a great design now taking shape from Architype.

St Luke's Hospice

Following on from our work at Thames Hospice in Windsor, we are looking forward to expanding our hospice experience with this new project.

St Luke's is a well established hospice and this new premises will allow them to expand their in-patient and out-patient services. The new hospice will have 28 inpatient beds in individual en-suite rooms and a new Day Centre. The new building has a strong focus on low energy design and will have a PV array to meet the local authority requirement for 10% of energy from renewable sources.

Sports and Social Updates

As well as regular extra curricular activities being offered across all the offices, we like to hold social and sports events once a quarter.

The last social event took place at Swindon **FootGolf**, with the sports event being held at **Cotswold Canoe Hire**. Our annual sports day and BBQ also took place on Friday August 4th and more recently we held our annual team building event at Swindon Rugby Club which took the theme of, 'It's a knock out'. Pictures of some of these events can be found below as well as on our **website**. You can't say we aren't an active bunch at Method!

A big welcome to the below new team members

Ethan Lee / Apprentice CAD Technician, **Jake McGhee** / Building Services Engineer, **Ben Perrigo** / Apprentice CAD Technician, **Oliver Read** / Apprentice CAD Technician, **Ronan Moona** / Building Services Engineer, **Rebecca Ross** / Business Development & Marketing Coordinator, **Riccardo Shirres** / Building Services Engineer, **Joanne Quirin** / Sustainability Consultant, **Ghena Zakhour** / Sustainability Consultant.
